

## Worksheet 2 – Solving for the Unknown

### Part A – Missing Addend

Find the missing number (n).

1.  $n + 4,356 = 9,245$
2.  $7,835 + n = 12,403$
3.  $n + 8,214 = 10,000$
4.  $9,876 + n = 15,000$
5.  $n + 5,495 = 9,872$

### Part B – Missing Subtrahend or Minuend

Find the missing number (n).

1.  $12,435 - n = 8,209$
2.  $n - 3,650 = 7,495$
3.  $9,876 - n = 5,678$
4.  $n - 4,327 = 9,999$
5.  $15,000 - n = 7,432$

### Part C – Check Your Work

For each question above, **verify your answer using the inverse operation** (addition ↔ subtraction).
